

Structured Education How ready are you for Accreditation?

**Diabetes Education Network (DEN)
4th National Conference - Manchester 2010
Wednesday 3rd November**

In association with
**Diabetes
UK**
The charity for
people with diabetes

Call for Abstracts

We are looking for abstracts either with outcome data from your structured education programme or on how you are quality assuring your programme.

You can find data sheets for both type 1 and type 2 diabetes at www.diabetes-education.net so start collecting your clinical outcomes now.

If your abstract is accepted for presentation - we will give you half price registration! (one person)

Help the diabetes community by contributing to the evidence base for structured education in the UK.

For more information about submitting an abstract please contact

suz.lucas@uwclub.net or
joan.everett@btinternet.com

Your abstract needs to be submitted electronically to Suzanne Lucas (suz.lucas@uwclub.net) by Monday 6th September so that it can be considered by the DEN Steering Group. A decision will be taken as to whether it will be accepted and whether it will be an oral or poster presentation by Friday 17th September.

Guidelines for Posters

- Size of poster will be a maximum of A0.
- At least 1 member of your team must attend conference.
- The idea of the poster is that you present your work clearly and simply. It is useful to have headings such as introduction, outline of programme, results, conclusions.
- A poster should not have too much detail but is a snapshot of your work.
- If you want to prepare handouts with additional details this is acceptable.
- Please include contact details on your poster.
- An electronic copy (ideally PDF) of the completed poster should be sent to ian.lucas@uwclub.net before the conference and will be available on the DEN website after the conference.

~~~~~

**If you have any questions or require any more information on any other aspect  
of the conference please contact Ian Lucas at [ian.lucas@uwclub.net](mailto:ian.lucas@uwclub.net)**

Conference supported by Roche Diagnostics Ltd.
